

YASH SAVALIYA

Full Stack .NET Developer & Angular | SaaS Backend

+91-8104017448 | tpyashsavaliya13092002@gmail.com | linkedin.com/in/yash-savaliya | Ahmedabad, Gujarat, India

PROFESSIONAL SUMMARY

Full Stack .NET Developer with **2+ years** of experience building and maintaining production-grade SaaS applications using **ASP.NET Core**, **Angular**, **SQL Server**, and **Azure**. Experienced in developing secure, scalable web applications, REST APIs, authentication systems, and event-driven backend solutions using CQRS, MediatR, Redis, and RabbitMQ. Strong background in incident management, payment processing, performance optimization, and multi-tenant SaaS platforms. Seeking opportunities to contribute to high-scale product and enterprise applications.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core (.NET 6/8/10), Web API, MVC, Entity Framework Core, LINQ, CQRS, MediatR, Clean Architecture, .NET Aspire

Frontend: Angular 14, Blazor, TypeScript

Architecture: Monolithic Architecture, Microservices, CQRS, MediatR, Clean Architecture, Event-Driven Architecture, Outbox Pattern

Cloud & DevOps: Microsoft Azure, Azure AD, Azure Blob Storage, Azure App Service

Databases & Messaging: SQL Server, Azure SQL, Oracle, Redis (State Mgmt), RabbitMQ (Outbox Pattern)

Security & Auth: Keycloak, JWT, RBAC, HMAC, OAuth 2.0, Azure AD B2C, Veriff KYC Integration

Tools: Git, Postman, Swagger / OpenAPI, IIS, Visual Studio, Azure Portal

PROFESSIONAL EXPERIENCE

iTechOps

November 2024 – Present

Full Stack Developer • Ahmedabad, Gujarat, India

- Architected and owned backend modules** for a white-label SaaS monitoring platform, reducing average incident downtime from **30+ min under 5 min** (6× MTTR improvement) across multiple enterprise clients.
- Designed extensible alert-processing engine** with pluggable notification providers (Email, Slack, MS Teams), reliably handling **14,000+ alerts/month** with built-in throttling, retry policies, and failure-handling to prevent notification floods.
- Improved API and database performance by **~30%** through EF Core query optimization, strategic indexing, and N+1 elimination across multi-tenant SaaS workloads.
- Implemented multi-tenant auth and RBAC** using Keycloak, JWT, and Azure AD — securing role-based access across 5+ enterprise SaaS clients.
- Resolved production incidents (alert misfires, IIS deployment failures, DB deadlocks) with root cause analysis and zero client SLA breaches.

KEY PROJECTS

Incident Management Platform — White-Label Status Page (SaaS)

Tech: C#, ASP.NET Core MVC, .NET 8, Azure SQL, Azure Blob Storage, ChartJS, Entity Framework Core

- Built a centralized incident management system enabling real-time monitoring, incident tracking, and resolution workflows for enterprise clients.
- Developed a fully customizable white-label Status Page with brand theming, allowing clients to surface uptime and incident data to their own end users.
- Integrated ChartJS-powered dashboards for incident trend analysis and SLA uptime visualization (99.9% target tracking).
- Designed automated multi-channel notification system (Email, SMS) triggered by incident severity tiers for timely stakeholder communication.

Payment Gateway — FinTech SaaS Platform

Tech: .NET 10 (Aspire), ASP.NET Core Web API, Blazor, MediatR, CQRS, HMAC, Redis, RabbitMQ, SaltEdge, Veriff

- Built customer and back-office portals in Blazor with seamless backend API integration and Azure Blob Storage for KYC document handling.
- Engineered distributed transaction reliability:** Redis for in-flight state management + RabbitMQ with Outbox Pattern for guaranteed event delivery and failed DB transaction recovery.
- Designed CQRS + MediatR KYC workflow integrating Veriff for identity verification, fraud signals, and automated approval/rejection decisions.

- Built end-to-end open banking payment processing (PayIn/PayOut) via SaltEdge; secured with HMAC-validated webhooks for real-time payment status sync.
- Configured dual-auth: Keycloak for customer portal + Keycloak + Azure AD for back-office with granular RBAC role mapping.

EDUCATION

Bachelor of Technology (B.Tech) — Information Technology

Oct 2020 – Jul 2024

RK University, Rajkot, Gujarat | CGPA: 7.49 / 10.0

ADDITIONAL

Notice Period: 2 Months | **AI Upskilling:** Azure OpenAI, Semantic Kernel, RAG Pipeline Design for .NET
